Illinois Department of Transportation

IL120 STUDY

IL60 to Almond Road

WELCOME

DRAFT

Thank you for visiting the Illinois Department of Transportation's Public Information Meeting for the **Illinois 120 PEL Study**. We appreciate you taking time to learn more about this study and provide input.

WE HOPE YOU WILL:

- Sign-in
- Watch the Presentation
- Take a Look at the Exhibits
- Ask Questions!
- Provide Feedback

WHAT YOU WILL LEARN ABOUT:

- About the Study
- Study Area
- Existing Conditions
- Ideas for Improvement

Connect@IL120Study.com | IL120Study.com

LEVEL 1 SCREENING CRITERIA

Alternatives were evaluated based on the following criteria:

Does it provide a safety benefit?

- Additional through lanes and/or turn lanes
- Optimized traffic signal timing
- Consistent speeds
- Median improvements
- Reduced traffic volumes
- Elimination of at-grade railroad crossing(s)

Does it provide a mobility benefit?

- Congestion and travel time reliability
- Existing and future travel demand
- Level of service
- Local and regional route connectivity

Does it impact the natural and built environment?

- Parks and recreation
- Wildlife, threatened/ endangered species
- Historic sites
- Conservation areas
- Water resources
- Land use
- Socioeconomics
- Community resources

DRAFT

All alternatives were evaluated with non-motorized improvements through Level 1 Screening.

ABOUT THE STUDY

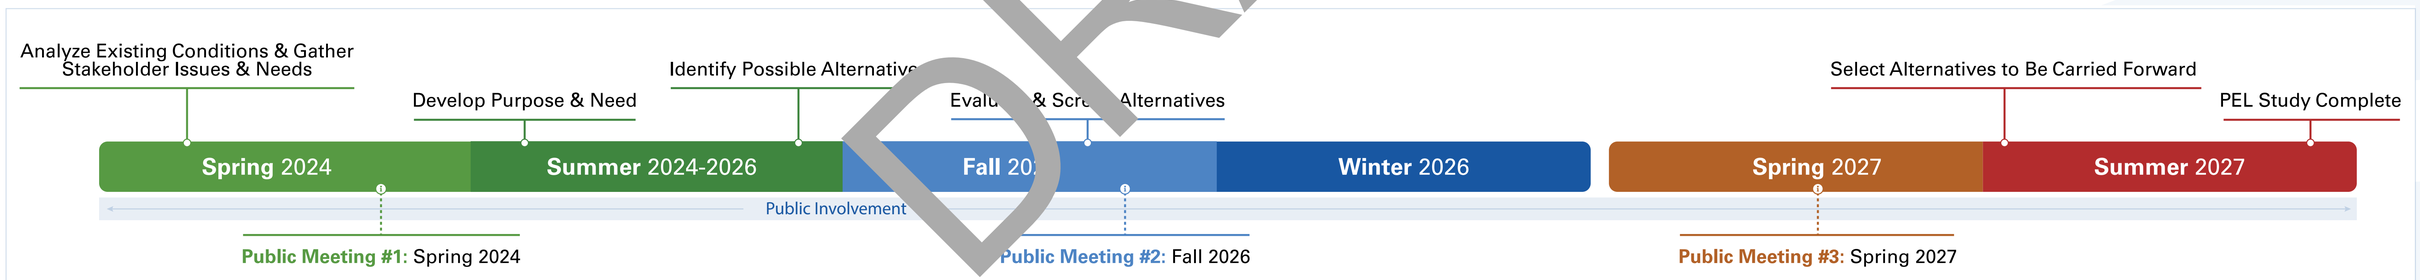

A **Planning and Environmental Linkages Study** or **PEL** is a planning study that provides for:

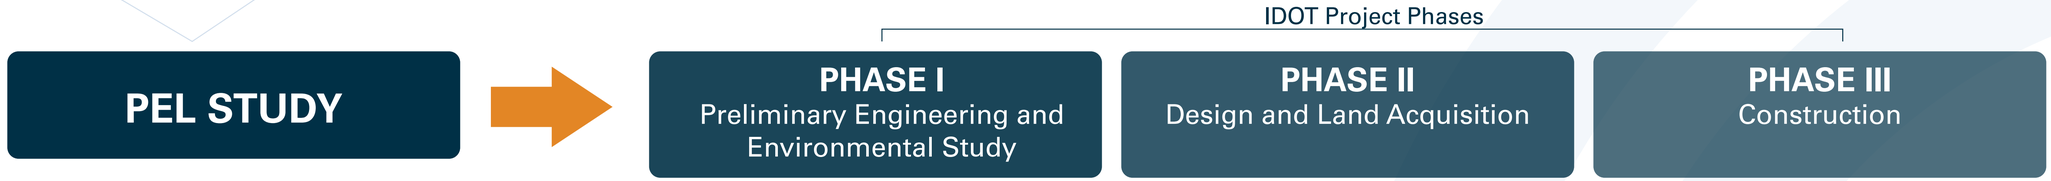

- A collaborative approach to decision-making
- Early consideration of:
  - Environmental issues
  - Community context
  - Economic or development goals
- Incorporation of information, analysis, and planning results into environmental review

A PEL will be conducted to enable the following planning products to be adopted into later environmental review processes:

- Approved purpose and need
- Screening of alternatives
- Basic description of the environmental setting
- Decision on methodologies for analysis

LOCATION MAP

The **project study area** for the PEL is along Illinois Route 120 (IL 120) aka Belvidere Road from west of Illinois Route 60 to east of Almond Road, approximately 9 miles.

Illinois Department of Transportation
IL120 STUDY
IL60 to Almond Road

PURPOSE AND NEED

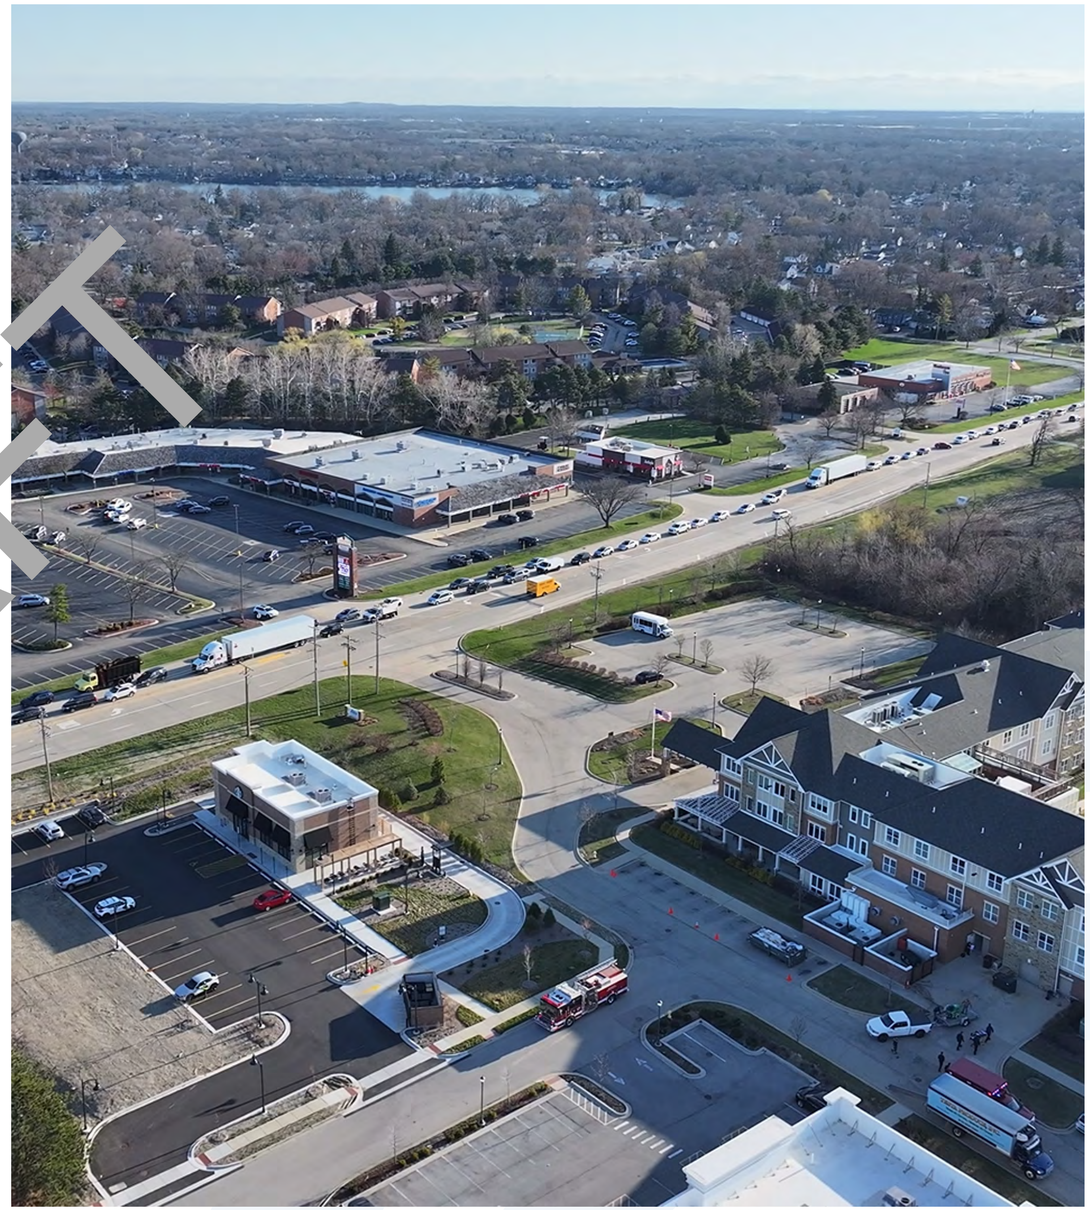

Project Purpose

The purpose of the PEL study is to improve safety for motorized and non-motorized users, reduce congestion and travel delays, and enhance modal interrelationships along IL 120 from IL 60 to Almond Road.

Project Need

Transportation system improvement(s) are needed in the IL 120 PEL Study Area to address the following issues that exist in the IL 120 corridor:

- Crashes on IL 120
- Travel delays and decreased traffic flow
- Gaps in the pedestrian and bicycle network
- Limited transit connectivity

DRAFT

PUBLIC INFORMATION MEETING #1 RECAP

Public Meeting #1

April 23, 2024
165 Attendees

- The project and existing conditions were introduced
- The Goals & Objectives of the project were shared
- Public input was collected to aid in the development of preliminary alternatives
- Applications for the Community Advisory Group were received
- Materials are available on the project website

Common themes emerged from the comments:

General Comments

- Support and opposition to widening IL 120 to add lanes
- Support and opposition to building an IL 120 bypass
- IL 120/IL 134/Hainesville Road intersections are congested
- Safety concerns over higher traffic levels
- Safety concerns about widening near schools, businesses, and churches
- Long commute times due to congestion
- Calming traffic with roundabouts

Railroad Crossings

- Build an overpass or underpass at IL 83 and the railroad
- Trains create long delays at IL 83 and IL 134

Bicycle and Pedestrian

- Make the IL 120 corridor safer and more accessible for walking and biking
- Need for safe pedestrian crossings
- Add safe crosswalks at all major intersections

Environmental Impacts

- Impact to water retention, flooding, air quality, noise pollution and wildlife
- Impacts to Almond Marsh

DRAFT

IL60 to Almond Road

COMMUNITY ADVISORY GROUP MEETINGS RECAP

The Illinois Department of Transportation has held four Community Advisory Group (CAG) meetings. The CAG provides insight into community issues and concerns and feedback on potential solutions for the transportation needs within their community. The CAG is comprised of a diverse group of representatives including: government entities, community organizations, education groups, and corridor users.

CAG 1

May 9, 2024
30 attendees

The CAG was presented with the existing conditions of IL 120 within the Study Area and identified issues pertaining to the corridor and their effect on the surrounding communities. The following feedback was received:

- Improve traffic flow by expanding the existing roadway
- Focus on addressing congestion at signalized intersections and railroad crossings
- Discourage traffic diverting from IL 120 and adversely impacting local roads
- Consider designs that promote slower speeds
- Address existing drainage issues and design with resiliency
- Improve non-motorized user facilities and access to transit
- Avoid environmental impacts such as wetlands and forest preserves
- Promote access to businesses
- Focus on improving quality of life

CAG 2

August 29, 2024
45 attendees

The CAG was presented with a Problem Statement, Purpose & Need, and Screening Criteria for the project and provid[ed] feedback that informed what w[as] prese[nted] and approved by the Federal [H]ighways Administration. The following f[ee]db[ac]k was received:

- Consider effect of [r]educed tra[vel]
- Consider effect[s on] air quality
- Prioritize preservin[g n]atural reso[u]rces
- Prioritize safety over t[rav]el effi[c]ency
- Protect conservation ease[m]ents and land-based economies
- Consider short-term cost-effective alternatives
- Consider Children's Independent Mobility when developing alternatives
- Protect homeowners near IL 120

CAG 3

A[u]gust 7, [2]025
[4]5 at[t]endees

[T]he CAG was presented with revised Screening Criteria, Initial Alternatives Considered, and Initial Screening Results. The following feedback was received:

- Evaluate improvements to adjacent arterials: IL 60 / Peterson Road and Washington Street
- Consider transit focused alternatives
- Evaluate improvements identified in the Belvidere Road Corridor Plan
- Consider a comprehensive multi-modal alternative
- Identify short term safety improvements
- Provide more detail for alternatives on the existing IL 120 alignment

CAG 4

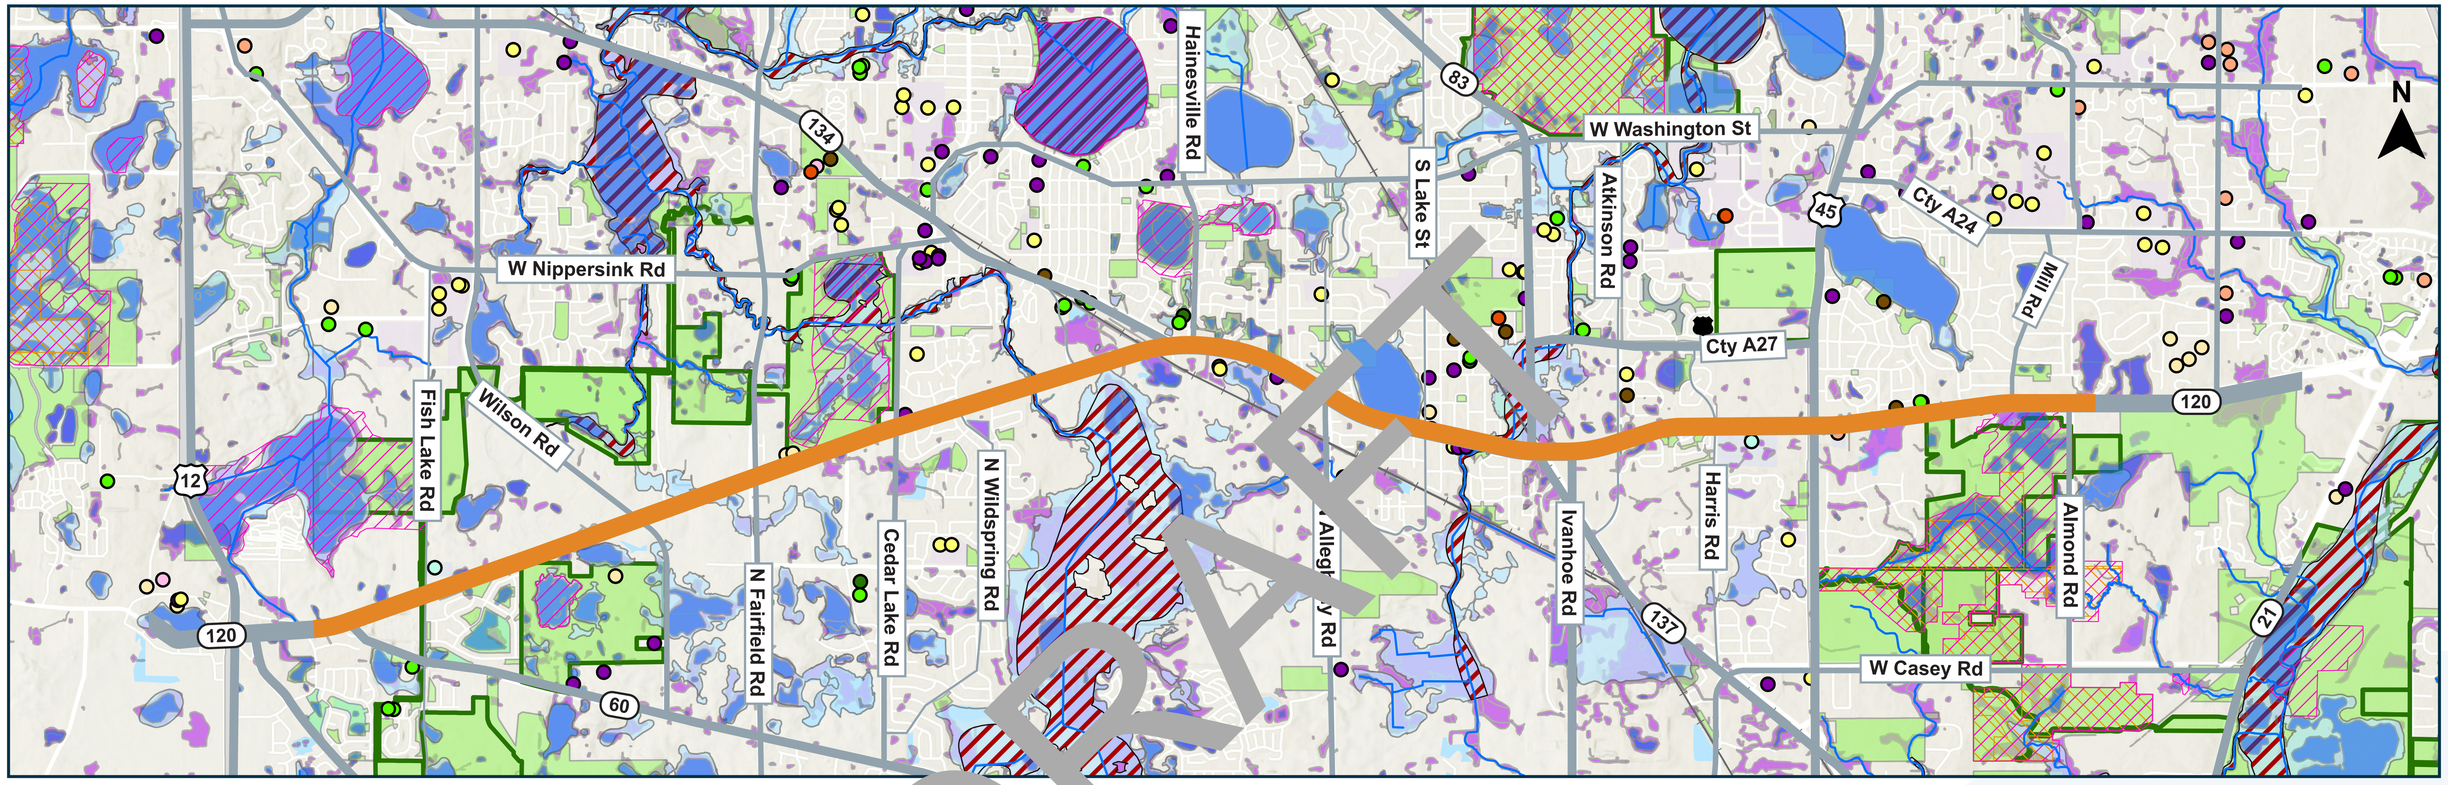

April 6, 2026
95 attendees

The CAG was presented with additional alternatives requested by the CAG, Spot Improvement alternatives, and On-Alignment Corridor alternatives. The following feedback was received:

- Update traffic projections when new data is available
- Provide bike and pedestrian level of service
- Support for on-alignment alternatives
- Opposition to bypass alternatives

DRAFT

REGIONAL RESOURCES OVERVIEW

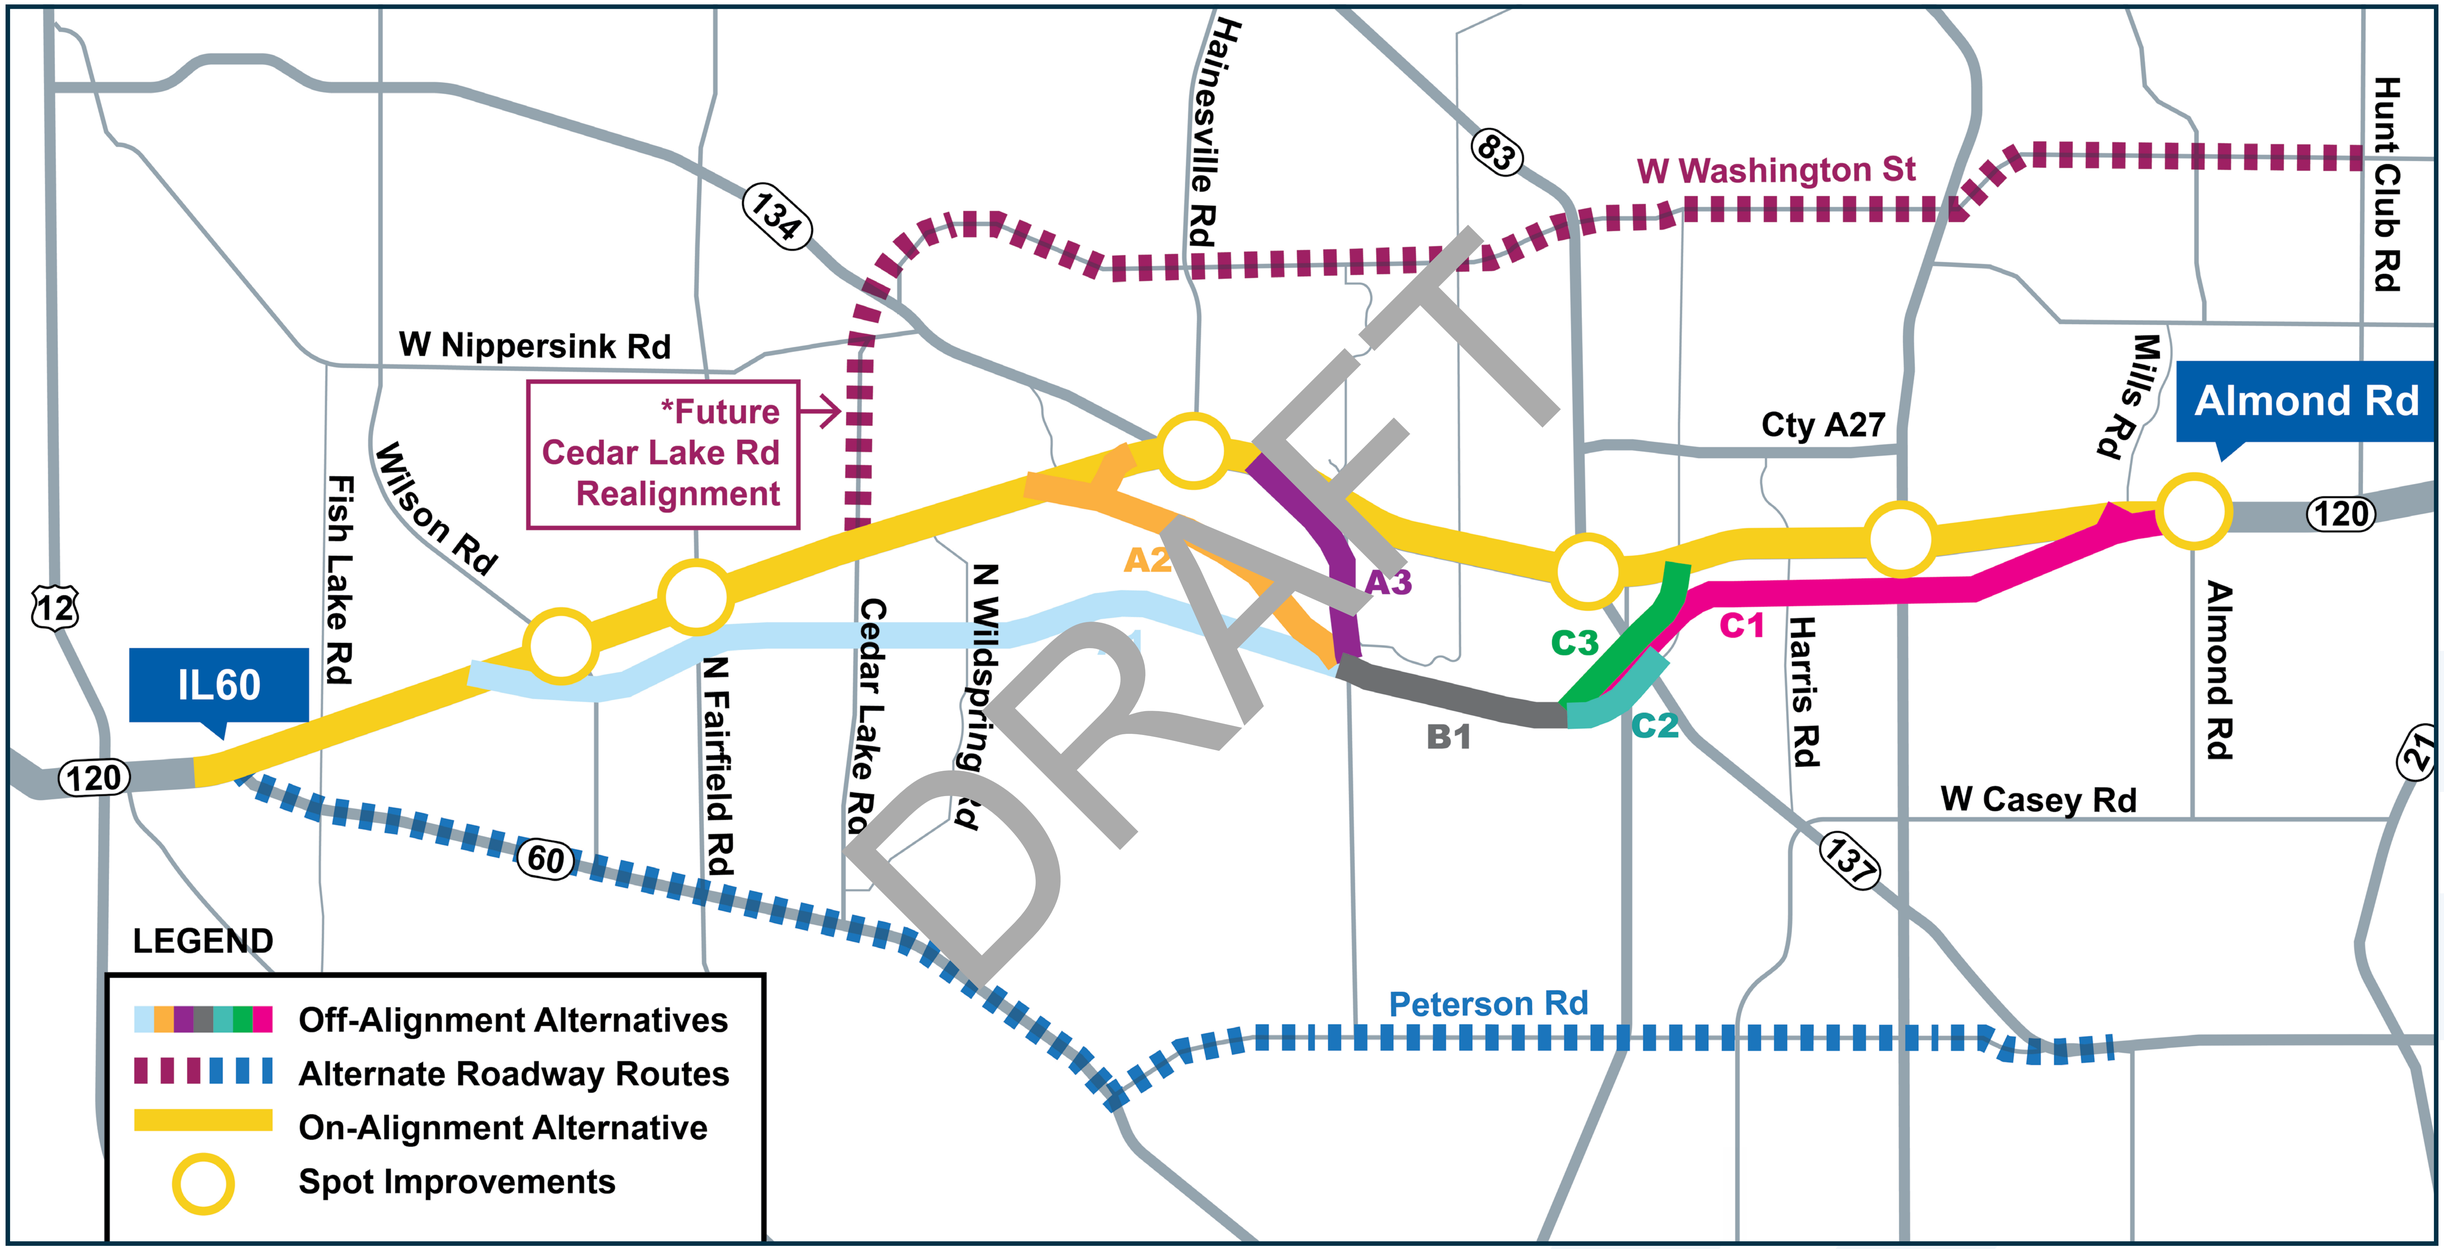

- Study Corridor
- Cemetery
- Community/Recreation Center
- Hospital/Medical Center
- House of Worship
- Law Enforcement
- Library
- Municipal Government Facility
- Museum
- School
- Senior Facility
- Forest Preserves
- Parks and Open Space
- Floodplain
- Floodway
- Waterbody
- Mapped Wetlands
- Railroad
- Illinois Nature Preserves Commission Site
- Illinois Natural Areas Inventory Site

INITIAL CONCEPT ALTERNATIVE LOCATIONS

ALTERNATE DEVELOPMENT & SCREENING PROCESS

STEP 1: DEVELOP PROJECT FOUNDATION

- Develop Purpose & Need (P&N)
- Develop Alternative Screening Criteria

STEP 2: DEVELOP & FILTER INITIAL ALTERNATIVES

- Feasibility Screening
- Purpose & Need Screening

WE ARE HERE **Level 1 Screening** — Compare Alternatives for: SAFETY • MOBILITY • ENVIRONMENT • COMMUNITY

ALTERNATIVES DEVELOPED WERE GROUPED INTO THREE CATEGORIES.
Alternatives within each category below are compared to other alternatives within the same category into Level 2 Screening. All results below are recommendations and subject to change pending public comment.

ON-ALIGNMENT 10 Initial Alternatives	OFF-ALIGNMENT 11 Initial Alternatives	SPOT IMPROVEMENT 6 Locations, 17 Alternatives
• All Advance to P&N	• All Advance to P&N	• All Advance to P&N
• 8 Advance to Level 1	• 9 Advance to Level 1	• All Advance to Level 1
• 7 Advance to Level 2	• 5 Advance to Level 2	• All Advance to Level 2

STEP 3: REFINE & COMPARE REMAINING ALTERNATIVES

- Refine Alternatives
- Level 2 Screening — Compare Alternatives for: SAFETY • MOBILITY • ENVIRONMENT • COMMUNITY • PROPERTY • COST

Alternatives that advance beyond Level 1 Screening are first compared within their category. The strongest alternatives within their category are then compared to each other.

STEP 4: FINAL SELECTION & NEXT STEPS

Alternatives recommended to be carried forward for evaluation in Phase I.

The strongest alternative(s) that provide the best performance while considering impacts are recommended and prioritized.

No-Build (No Changes) will be retained throughout the screening process, maintaining NEPA Compliance.

DRAFT

IL120 STUDY
IL60 to Almond Road

FEASIBILITY AND PURPOSE & NEED SCREENING

Feasibility Screening Criteria

- Impacts to Conservation Lands that are not allowed under deed restrictions or cannot be mitigated
- Demolition of Historic Structures
- Impacts to USFWS-identified Critical Habitat
- Construction, operation, or maintenance constraints that cannot be overcome
- Addition of new at-grade railroad crossing

RESULT:
All alternatives advanced to Purpose & Need Screening

Purpose & Need Screening Criteria

- Increase Safety
- Improve Mobility
- Support Multimodal Connections

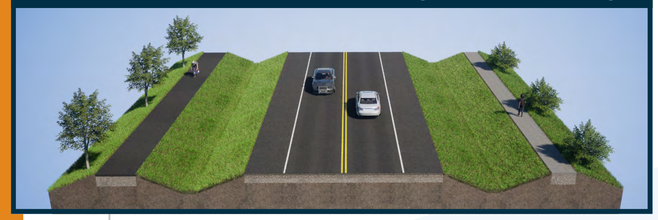

RESULT:
Alternatives set aside from further evaluation:

Two-lane rural cross section: Does not meet the safety needs of the project

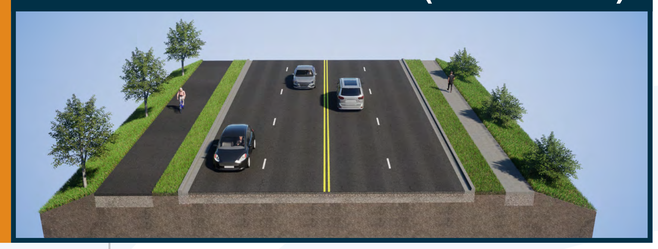

Four-lane urban cross section: Does not meet the safety needs of the project

RESULT:
All other alternatives advance to Level 1 Screening

2-Lane Rural Arterial (No Median)

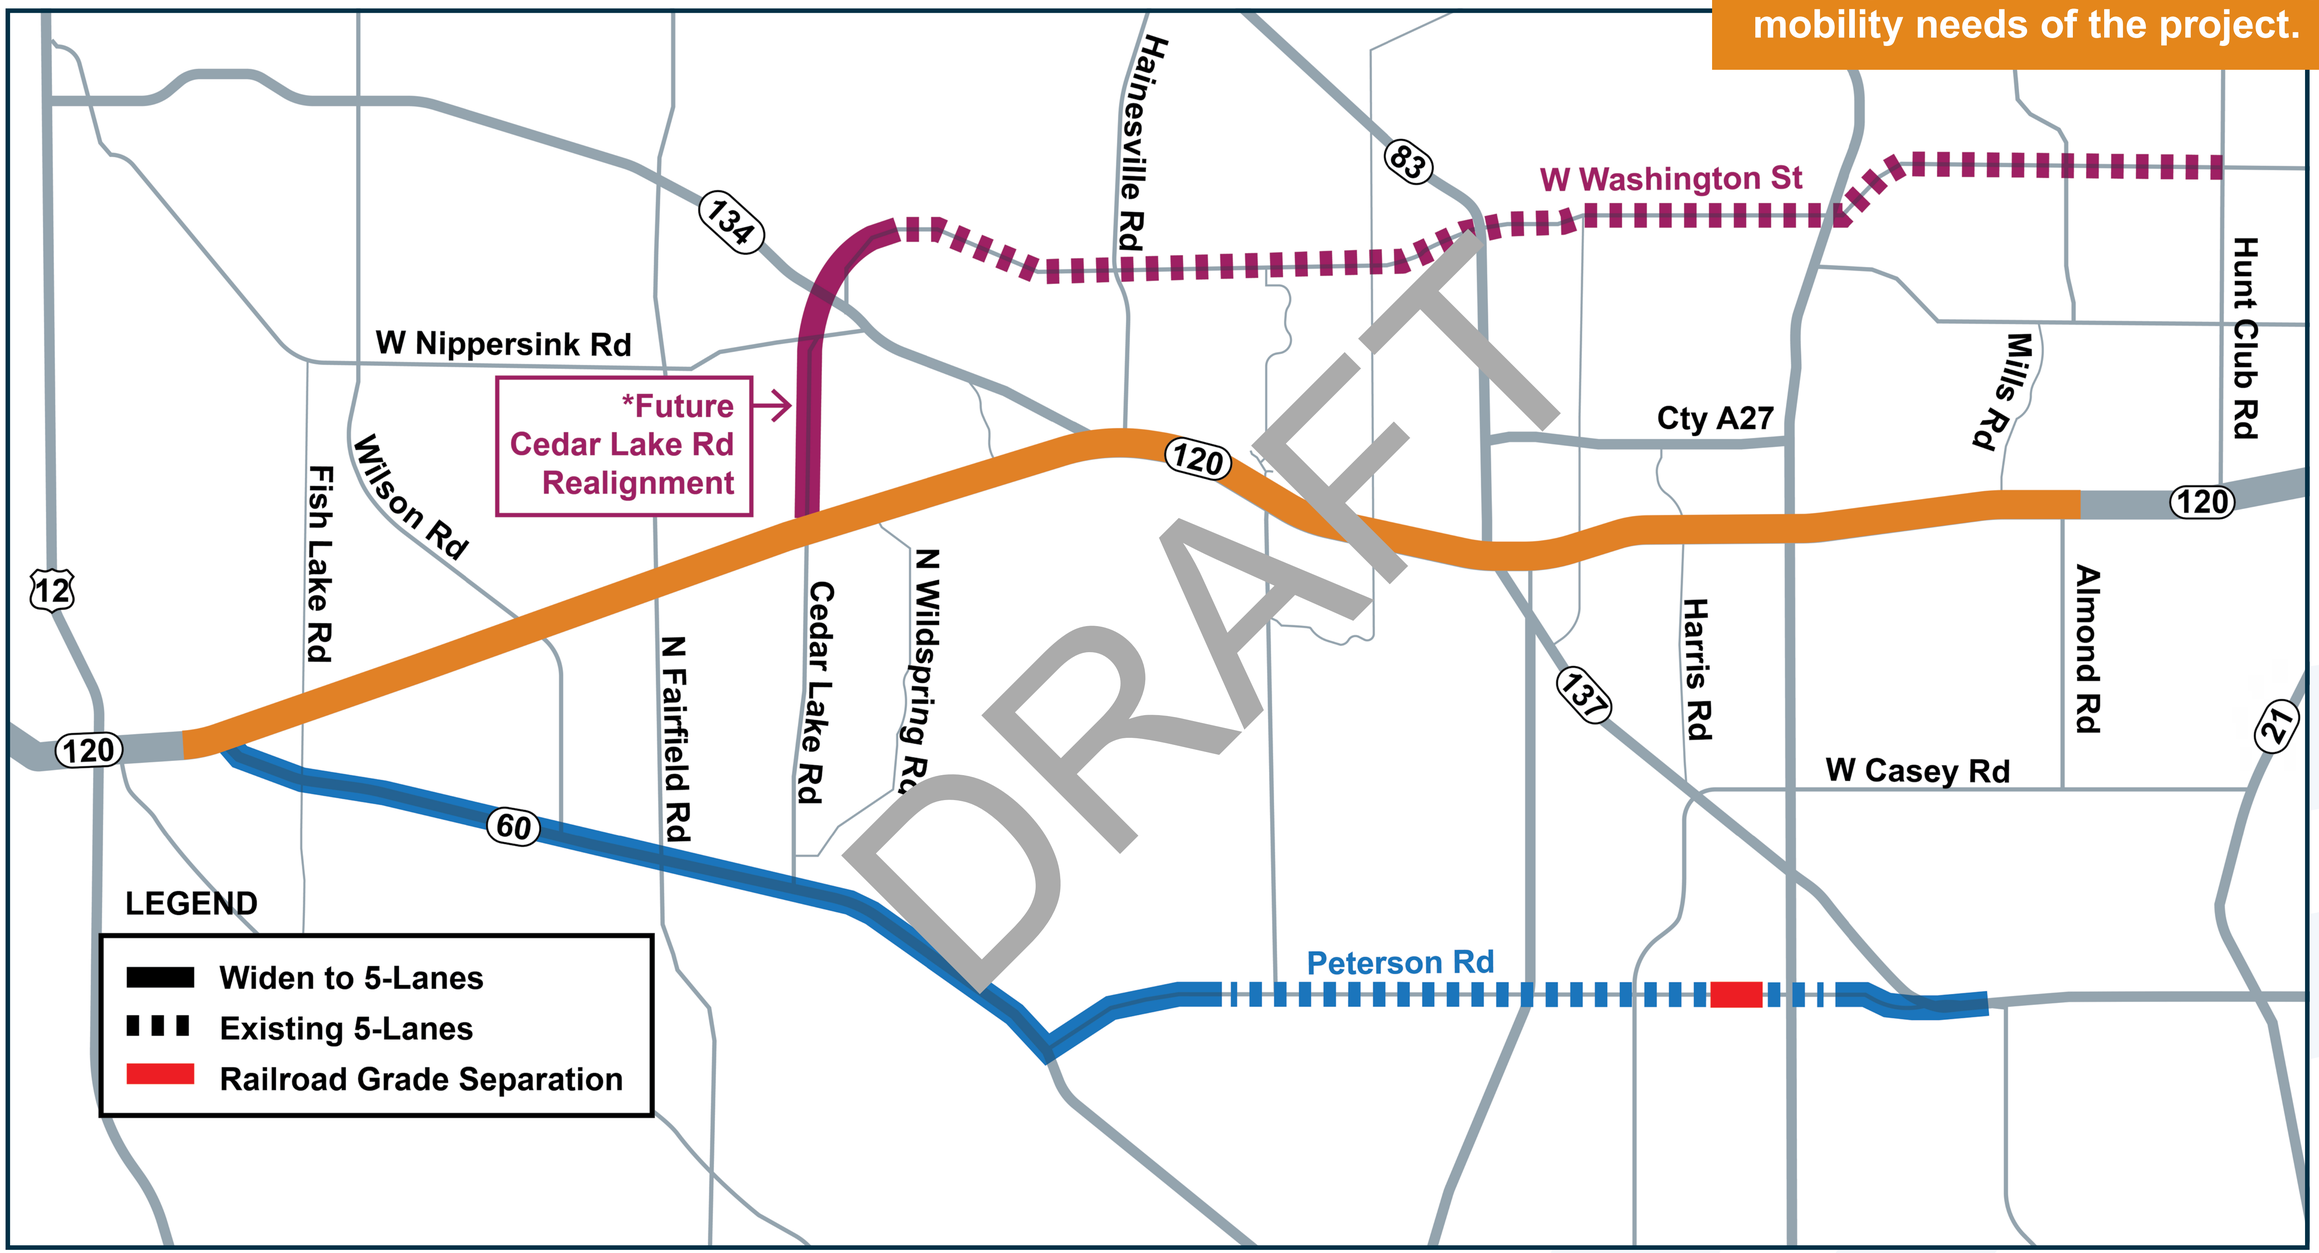

4-Lane Urban Arterial (No Median)

DRAFT

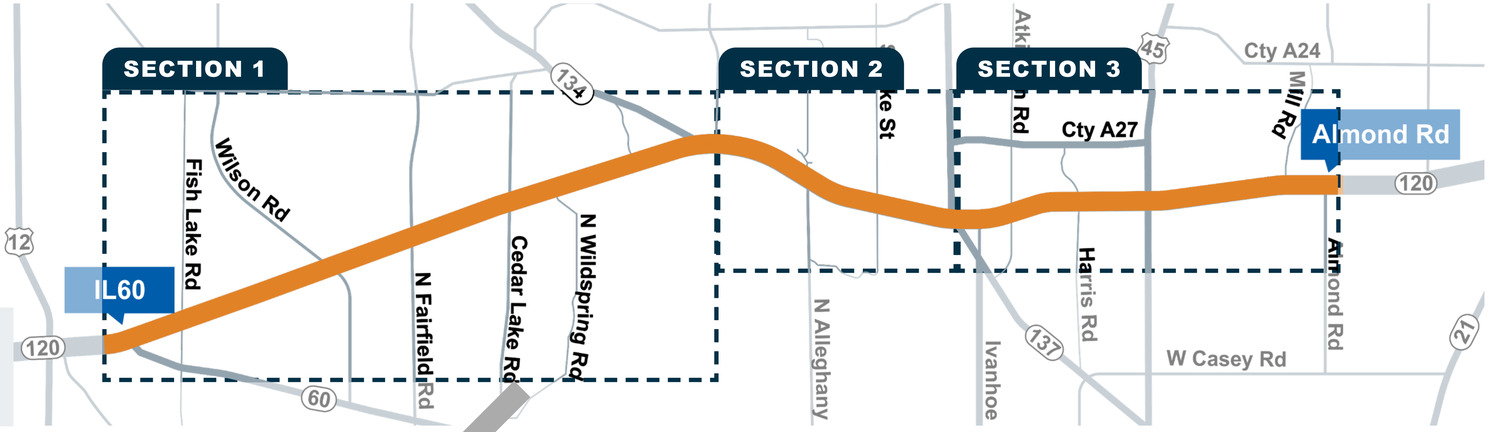

ALTERNATE ROUTE ALTERNATIVES

RESULT: Alternative routes did not meet Purpose & Need screening as they did not meet the safety and mobility needs of the project.

LEVEL 2 SCREENING CRITERIA

Alternatives will be evaluated based on the following criteria:

Does it increase safety?

- Expected reduction in crashes
- Improve safety at railroad crossings

Environmental Impacts

- Quantitative review of mapped resources: Parks and open space, prime farmland, forested areas, wetlands, streams, floodplains, habitat for sensitive species
- Qualitative review of built environment: potential noise and air quality impacts, socioeconomics, and community facilities and services

Does it increase mobility?

- Level of Service at intersections and in corridor
- Directional travel times
- Travel time predictability at railroad crossings

Technical Feasibility

- Logical termini and independent utility
- Construction duration, approach, and staging
- Maintenance and operations of structures and pump house, if required

Does it support multimodal connections?

- Connections to existing and planned non-motorized facilities
- Number of access points to transit

Property Impacts

- Number and acres of relocations and/or partial acquisitions by type of land use

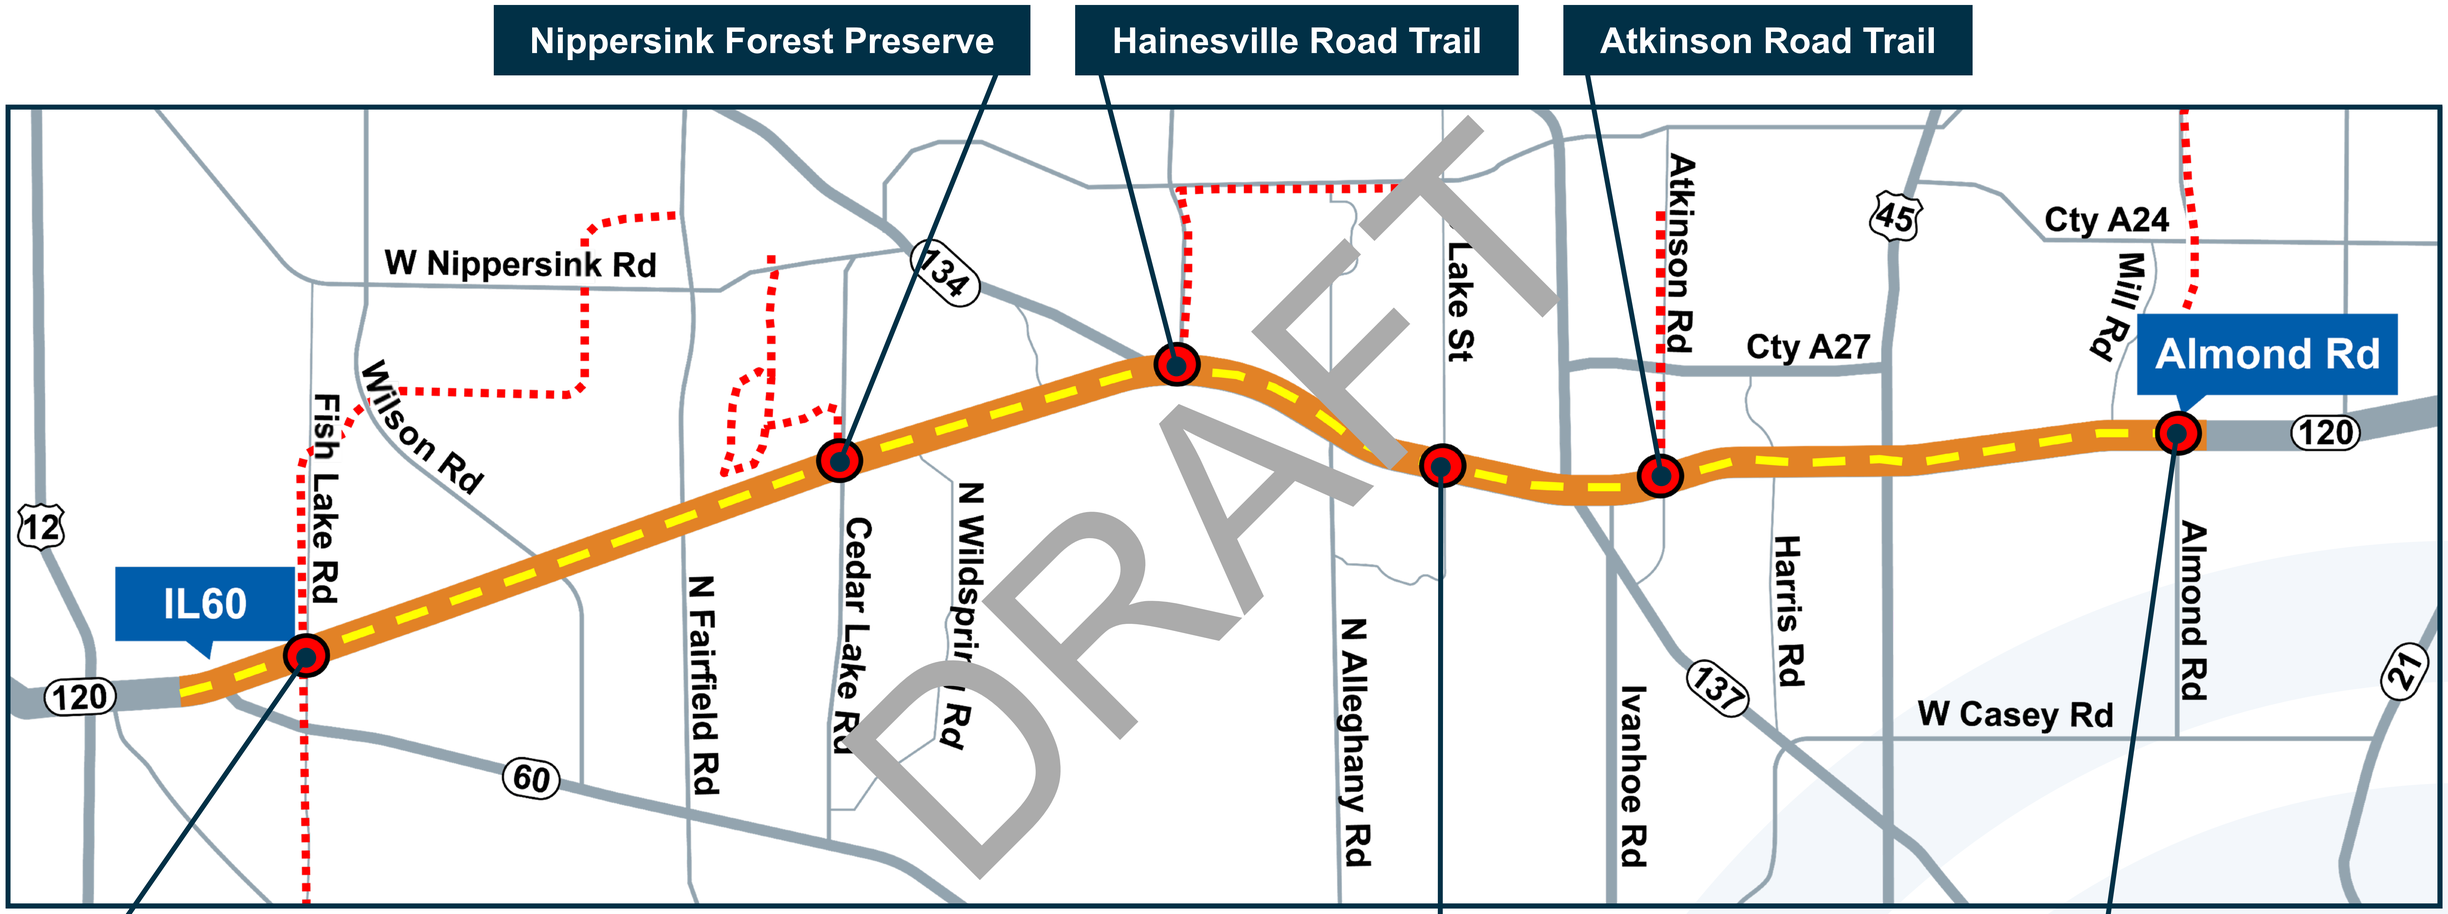

Cost

- Design
- Right-of-way
- Utilities
- Construction

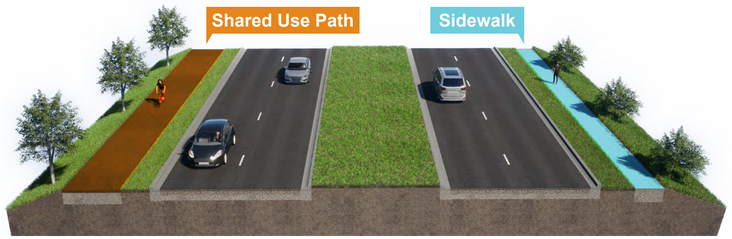

DRAFT

NON-MOTORIZED CONNECTIONS

All corridor alternatives provide a shared-use path on one side and a sidewalk on the other.

Proposed Non-Motorized Facilities
